

Formula 		
precondition	statement	postcondition
{this.floors != null & this.floors.length >= 0 & id >= 0}	statement	{topFloor(id, this.floors.length, \result)}

Variables
PUBLIC Floor[] floors RETURN boolean ret PARAM int id

ReturnStatement1

precondition	Return Statement	postcondition 
{this.floors != null & this.floors.length >= 0 & id >= 0}	(id == this.floors.length - 1);	{topFloor(id, this.floors.length, \result)}
